Jun 14, 2017 How to Stop Two-Side Printing From Being the Default in macOS Justin Pot @jhpot June 14, 2017, 1:13pm EDT Two-sided printing is great in theory.. Unfortunately, there's no way around that Inkjet printers, on the other hand, don't suffer from this problem.. I believe it's because Word has far more complicated printing options for documents, but be that as it may, it's quite odd that you can't choose duplex / 2-sided from within the Word print settings window.. Here's how to check that: Open System Preferences ➡ Printers & ScannersChoose your printer and then click Options & Supplies…In Options, check the Double Printing Unit featureHit OKEven if your printer doesn't support double sided printing at all, don't despair and follow this secret trick:Open the Print menu once again (use ⌘ + P)Click the Preview dropdown menu below Orientation and choose Paper HandlingIn Pages to Print, set the value to Odd OnlyClick Print to get pages 1, 3, 5, and so onSimply flip on long edge everything that's been printed so far and put the papers back into the printerStart the Print menu, but now in Pages to Print select Even OnlyHit Print and your double sided printing process is overNote: Some old laser printers might jam your paper when you try to run it through the second time.. Regardless of whether you use Google Chrome, Firefox, Safari, or some other browser — they all employ a standard macOS printing dialog window.

## how to make microsoft word not print double sided on mac

Nevertheless, we now print less than ever before, to the point where lots of us don't know how to print front and back on Mac and end up using twice as much paper — not a very progressive stance, is it?But don't worry.. Good news is that if you have a printer that you've bought in the last 10 years or so, it most certainly has the double sided printing (also called duplex printing) option built right in.. Why And How To Print On Both Sides Of PaperSetting the environmental question of paper waste aside, simply knowing how to print double sided on Mac in Word or Google Docs will instantly elevate the presentation of your documents.

## how do you print double sided on microsoft word

The guide below will teach you how to print two sided on Mac so your documents can look their best while you save some trees in the meantime.. If you don't see the Print on Both Sides options, you have to manually print Make other settings as necessary on the Print screen.. Here's how to get to it: Go to File in the Google Docs menu and then Print (or use a shortcut ⌘ + P)Check the Two-Sided box next to CopiesPress PrintThis workflow can be applied not only to Google Docs but to virtually any web app (and even website) out there.. The difference between long edge vs short edge is similar to how a regular book and a lab notebook are bound.. How to print double sided on WordMicrosoft Word (or any other Microsoft Office software) behaves a bit differently that lots of other apps since it outputs its own custom printing dialog window, which might get confusing at first if you've ever printed anything on Mac before.. Reading on paper comes naturally to us, since it's been a part of our culture for centuries.. Apr 08, 2020 You're definitely not the first Mac user to notice that Microsoft dropped a different printer driver

interface into Word than it has in its other Mac programs.. Ensure that the document has just been saved Click the Duplex Printing button on the Print screen.
